Take it to the next level

Océ CS650 Pro

Profitable color production
with finishing to match your job mix

Successful commercial printers and in-house printrooms are always pushing the envelope. Customers—and the market—simply demand it. Yet every business is unique. With different clientele, business needs and production requirements.

Whatever your requirements, the Océ CS650 Pro can take you to the next level—of customer satisfaction, performance and profitability. With configuration choices that deliver delightful results, support your current and desired job mix, and minimize your total cost of ownership.

Profitable color production with finishing to match your job mix

Take your customer satisfaction to the next level

Take your customers' color production to new heights and enhance your reputation along the way. The Océ CS650 Pro makes it easy, with quality results that are sure to impress.

The Océ CS650 Pro delivers full-color production performance with a choice of finishing configurations. Print and copy in color and black & white at 65 ppm; depending on your configuration, you can even add multiple scan functionalities.

In addition, because it's digital, the system gives you the means to provide variable data printing, cost-efficient short runs and more. In short, the systems' versatile state-of-the-art technology lets you offer more applications at attractive prices.

Blaze new territory for customers

Whether your customers work within your corporation or are part of your commercial printing clientele, the Océ CS650 Pro will help them communicate more effectively. The system produces beautiful, full-color brochures, manuals, newsletters, flyers, marketing materials and more that give customers the tools needed to command attention in an information-saturated world.

The Océ CS650 Pro features new high-definition toner that serves up rich colors and dense, luscious blacks. Quality and fidelity that ensure your customers turn to you whenever they want to blaze new territory.

Finish with flair

The Océ CS650 Pro comes in diverse finishing configurations including:

- The high capacity stacker for long unattended print runs
- The integrated stapler for reports with ease
- The booklet maker for high quality brochures
- The multi-folding unit for mailings, leaflets, flyers and punched manuals
- The perfect binder for glue-bound manuals and books

So you can easily take your business to the next service level. And ensure that customers come back again and again.

Take your performance to the next level

The Océ CS650 Pro provides the quick turnarounds your customers require. With an output volume of up to 300,000 pages a month and a professional EFI® Fiery® or Creo® Color Server that provides consistently high throughput, and supports available finishing options. Both controller options further promote productivity with sophisticated tools for color, queue and device management.

Whether you select the EFI Fiery or the Creo Color Server depends on your preferred workflow and job mix. Smooth integration into existing workflow and prepress systems ensure a short learning curve and maximum performance right from the beginning. So you can count on a brisk 65 pages per minutes in both color and black & white to meet even your tightest deadlines.

Move media like you mean it

Huge media capacity allows you to maintain the speed you need. The Océ CS650 Pro has 7,500-sheet input capacity and output capability of up to 8,400. So when you need real (unattended) production printing, the Océ CS650 Pro always delivers.

Exceptional media handling, including the ability to run substrates of up to 300 g/m² and 330 mm x 487 mm on standard and coated media, and robust production-class finishing options further boost your print and copy performance.

Take your profitability to the next level

The Océ CS650 Pro total cost of ownership (TCO) is very attractive. Quick turnaround and intuitive controls that minimize time-wasting, costly mistakes ensure that the basic system always saves you money.

Add Océ PRISMA® software and you really improve your workflow. This tightly integrated workflow management suite works seamlessly together to help you grow your business.

Profitable color production with finishing to match your job mix

Mix it the way you want it

At the heart of the Océ CS650 Pro is the freedom to choose the production configuration that's best for your level of color business. The Océ CS650 Pro allows you the following system choices.

While these are the most common configuration choices, we can provide a variety of options based on your unique requirements, job mix and business needs. Your local Océ representative will be happy to help you decide on the best system configuration to meet your requirements.

We've got your back at every level

You can count on your Océ CS650 Pro performing when you need it. That's because we back every system with our world-class, one-stop service and support organization. Océ employs industry specialists who understand your business processes and enhance them with leading-edge Océ industry solutions. Making us a true business partner.

In addition, we'll be there when you're ready to grow in color. The Océ CS650 Pro family is the latest addition to our cutsheet production-color portfolio. This also contains our Océ CPS line, which provides unique color consistency on a wide range of media including structured papers. We can even provide the financing that makes sense for your business. So you can get to the next level in a fiscally responsible manner.

Beyond the Ordinary

Printing for Professionals

Océ helps the people who make our world. Companies everywhere use Océ technical documentation systems in manufacturing, architecture, engineering and construction. Each week, high speed Océ printing systems produce millions of transaction documents such as bank statements and utility bills. And in offices around the world, people use Océ professional document systems to keep the wheels of business and government turning. Océ is also at work in publishing on demand, newspaper production, document management outsourcing and wide format color for spectacular display graphics. It all helps our professional customers go "Beyond the Ordinary" in printing and document management.
